

DOMAINE HERESZTYN-MAZZINI

BOUGOGNE PINOT NOIR

The Domaine Heresztyn-Mazzini is today based on organic growing and biodynamics, as much for vines as vinification, as well as during ageing of the wines. Florence and Simon look for precise and coherent balance from soils through to bottling. This balance is achieved through understanding their terroirs and vines to choose the best options, according to each parcel of vines and each vintage.

They place great importance on respecting nature and the environment and use environmentally friendly pest control. All of the estate's plots are ploughed. To improve the yield, once pruned the vines are de-budded and thinned early by hand and a green harvest may be chosen.
